# RS3200 Function Summary

**<Glossary>**

| | |
|---|---|
| RS3200 | Keyless Entry/Security System |
| Arming | Enables the system to detect theft |
| Disarm | Enables the system to deactivate the arming/alarm modes |
| Panic mode | System mode which allows one to activate the alarm using the remote |
| Trunk release | Opens the trunk using the transmitter |

**<Description>**

1. Remote Arming/Door Lock Function
   Pressing the "LOCK" button of transmitter locks the doors and arms
   the RS3200 system.

2. Remote Disarming/Door Unlock Function
   Pressing the "UNLOCK" button of transmitter unlocks the doors
   and disarms the RS3200 system.

3. Panic Function
   Pressing the red "PANIC" button of transmitter, activates the RS3200
   panic function. During panic mode, the doors lock, the exterior/interior
   lights(head lights/dome lamp) flash, and the horn sounds for 60
   seconds. Pressing any button (LOCK/UNLOCK/PANIC/AUX*) or
   inserting the key into the ignition switch and turning it to the "ON"
   position, deactivates the panic mode.
   (*The AUX button can be used on transmitters with four buttons.)

4. Trunk Release Function
   Pressing "AUX" button of transmitter activates the trunk release
   function. This function can be used on transmitters with four buttons.
